RICHARDSON®

At Richardson, we know that high-quality headwear is more than an accessory. It's a statement that showcases your brand's identity and engages its community.

Our commitment to quality in every stitch helps you meet the expectations of your brand's consumers. We stand for quality because the products we create aren't just a reflection of your brand; they're a reflection of ours, too.

Brands and retailers trust Richardson to deliver the quality their consumers demand, along with on-trend product selection and high-touch, personal service.

We provide some of the world's most iconic brands and retailers with the ideal canvas their consumers ask for by name and are proud to wear. They depend on us to deliver custom made-to-order products that increase brand awareness, build consumer loyalty, and drive meaningful revenue.

We are committed partners in the journey of your brand, dedicated to crafting headwear that authentically tells its story.

Wear the Best. Since 1970.

MESH BACK

— THE — 112

The 112 is *the* quintessential trucker. Constructed with the trademark attention to detail that we've built our reputation on and shaped by over 50 years of cap-making expertise, the 112 has inspired many imitations yet continues to be America's favorite cap.

112FPR Loden/Loden
Woven Patch | CUW1700

112

TRUCKER

The 112 is the standard by which all truckers are measured. Popular for its undeniable quality and versatility, this casual classic is constructed with the trademark attention to detail that we've built our reputation on. With a design shaped by more than 50 years of cap-making expertise and available in over 50 colorways, the 112 has inspired many imitations yet continues to be the most popular cap in the USA.

PATCHES

EMBROIDERED PATCH

A traditional and proven decoration method reinvented and is now the new look for style conscious headwear buyers. Embroidered patches deliver a higher level of detail than direct embroidery and gives your cap a classic look.

- Simple shape patches have a merrowed or satin stitched edge and are hand stitched to the cap, complex shape patches have a satin stitched edge and are heat pressed to the cap
- Max size varies by cap style, patch shape, and application method

EMBROIDERED PATCH

LASER CUT EMBROIDERED PATCH

EMBROIDERED PATCH

LASER CUT EMBROIDERED PATCH

WOVEN PATCH

Woven patches can deliver a higher level of detail than embroidered patches and will give your cap a slightly more refined look.

- Simple shape patches have a merrowed or satin stitched edge and are hand stitched to the cap, complex shape patches have a satin stitched edge and are heat pressed to the cap
- Max size varies by cap style, patch shape, and application method

PATCHES CONT.

SUBLIMATED PATCH

A new twist to a classic decoration method. Sublimated patches are ideal for reproducing multi-colored, complex logos with small details.

- Simple shape patches have a merrowed or satin stitched edge and are hand stitched to the cap, complex shape patches have a satin stitched edge and are heat pressed to the cap; available in hybrid option with embroidery
- Max size varies by cap style, patch shape, and application method

SUBLIMATED PATCH

LASER CUT SUBLIMATED PATCH

SUBLIMATED PATCH

SUBLIMATED HYBRID PATCH

SCREEN PRINTED PATCH

A clean, bold look with a touch of old school style. Best for one or two-color logos with a moderate level of detail.

- Simple shape patches have a merrowed or satin stitched edge and are hand stitched to the cap; cannot be heat pressed
- Max size varies by cap style, patch shape, and application method

SCREEN PRINTED PATCH

SCREEN PRINTED PATCH

SCREEN PRINTED PATCH

SCREEN PRINTED PATCH

RUBBER PATCH

Our high quality rubber patches will give your cap a very bold and technical look. This decoration method adds an amazing level of dimension to any design. Ideal for multi-colored logos with a moderate level of detail.

- Rubber patches can be stitch or heat press applied
- All hand-stitched rubber patches must have a fairly simple shape with an outer edge gutter to allow stitching to the cap.
- Max size varies by cap style, patch shape, and application method

TRANSFERS

SILICONE TRANSFER

This modern decoration method provides a very high-end look and raises your logo or design to a new level. Silicone transfer matches well with any of our technical cap styles.

- Heat press applied directly to the cap with a matte finish
- Best when kept to one or two colors
- Weather and outdoor conditions will affect the durability and life of the decoration

SILICONE TRANSFER

SILICONE TRANSFER

SILICONE TRANSFER

SILICONE TRANSFER

FULL COLOR TRANSFER

A more detailed alternative to Silicone transfers that is heat pressed directly to the cap. From one-color logos to photographic prints, designs are free-floating and can be applied over a seam.

- Full Color Transfers sit on top of the fabric with a slight relief
- Weather and outdoor conditions will affect the durability and life of the decoration

FULL COLOR TRANSFER

FULL COLOR TRANSFER

FULL COLOR TRANSFER

FULL COLOR TRANSFER

SUBLIMATED TRANSFER

A modern and clean look, great for multi-colored logos and designs with a high degree of detail. Sublimation prints can be used only on a white, seamless foamie front panel cap style.

- Sublimation prints are fused directly into the foam
- Weather and outdoor conditions can affect the decoration

SUBLIMATED TRANSFER

APPLIQUE

FELT APPLIQUE

A classic and clean look offered in a wide variety of colors with one or two layers. Mix or match materials to create a unique look. Best for lettering and simple shapes.

- Felt applique is heat applied; optional decorative stitch can be applied inside letters
- Max size varies by cap style and application method

FELT APPLIQUE

FELT APPLIQUE

FELT APPLIQUE

LAYERED FELT APPLIQUE

WOVEN/SCREEN PRINTED APPLIQUE

This subtle decoration method adds a high quality, custom, and refined look to any cap or knit. Labels match well to unstructured cap styles and lighter-weight fabrics.

- Screen Printed labels work best in one-color application
- Woven clip labels are hand stitched to the edge of a knit hat or to the back of a cap

WOVEN CLIP LABEL

WOVEN LABEL

WOVEN LABEL

SCREEN PRINTED LABEL

ETCHED LEATHER CLIP APPLIQUE

This unique decoration method adds a rich custom look to any cap or knit. Ideal for single-colored logos with a moderate level of detail. Logos are laser etched on the leather clip. Leather clip labels can accommodate your logo on both sides of the clip.

- Offered in both genuine and faux leather (see color chart on page 53)
- Leather clip labels are hand stitched to the edge of a knit hat or to the back of a cap

GENUINE LEATHER CLIP LABEL

GENUINE LEATHER CLIP LABEL

FAUX LEATHER CLIP LABEL

FAUX LEATHER CLIP LABEL

ETCHED LEATHER APPLIQUE

Our etched leather applique gives your design a natural, rugged look with a touch of class. Ideal for complex designs with small detail and that look good in a one-color application. Available in genuine or faux leather.

- Ideal for single-colored logos with a moderate level of detail
- Simple shape appliques (circles, rectangles, etc.) are stitched to the cap
- Complex shape appliques (irregular shapes) are heat press applied to the cap

GLOSSARY

5 Panel

The five-panel is made with a flat or pinched front, making it the perfect construction for models with a printed front panel. The seamless design also makes it one of the easiest cap styles to decorate.

6 Panel

Our six-panel style is inspired by classic baseball caps and is as authentic as the game itself. Available in a wide range of profiles and fits, this traditional cap style is the go-to for both players and headwear enthusiasts.

7 Panel

Richardson's unique, modern seven-panel style offers a large, seamless front panel with a curved top seam, creating a fashion-forward design that's great for a wide variety of decorations.

Beanie

Also called knit caps, Beanies are designed primarily for cold weather conditions but are also worn year-round. Clip labels and patches are the best decoration methods for this style.

Bill

The bill is located at the front of the cap and extends outward to provide shade from the sun. It is typically made from a material that maintains its shape and can be flat or curved, depending on the cap design.

Bill Rope

This trim detail found where the crown meets the bill is a homage to mid-century golf style. Available in a variety of designs, including braided and paracord, it's a classic twist that brings vintage charm to modern headwear.

Brimmed

Our Brimmed styles are designed for maximum protection from the elements and feature a 360-degree brim. Available in both performance fabrics and natural materials like straw, these styles are well-suited for applique or patch decorations.

Buckram

This stiffer material, fused behind a cap's front panels, provides structure and shape, creating a crisp appearance and ensuring the cap retains its form over time.

Button

A small, usually rounded part located at the top center of a cap's crown, the button secures the point where the cap's panels converge. Beyond its structural role, it can also be a decorative feature that complements a cap's overall color design.

Comfort Stretch Sweatband

Our stretch-fit sweatband incorporates stretch fibers to simplify sizing and provide wearers with a comfortable fit all day, every day.

Crown

The upper part of a cap that covers the head, forming the main body. Typically composed of panels that are sewn together creating the shape and structure of the cap. The crown's design, height, and construction are crucial in determining the cap's overall style and fit.

Eyelet

These small holes, typically located around the crown, provide ventilation, allowing air to circulate and reducing heat buildup. They are usually reinforced with metal, stitched rings, or silicone and can serve as a subtle color hit to coordinate with the cap's overall color design.

Flip-Up Stay

Positioned behind the front panel of a cap, the flip-up stay is commonly made from a stiff mesh material and helps add shape and structure to a cap.

Floatable

Floatable caps - ideal for water-based activities - feature soft EVA foam in the bill or brim that allows the cap to float. This feature is especially valuable for activities like boating, fishing, or beach outings, providing peace of mind if your cap falls into the water.

Full Pro

Our Full Pro profile is an athletic shape that's taller and wider than our Mid Pro, but with a lower crown height than our Hi Pro. This profile also has a deeper fit in the back panels compared to Mid Pro.

Hi Pro

The Hi Pro profile is our nod to classic baseball crown shapes. It features a deeper all-around fit with tall front panels.

Laser Perforation

A testament to our dedication to style and functionality, these precise, cleanly-cut openings enhance breathability, merging precision craftsmanship with modern style.

Lite

Our lightest-weight fabric, Lite is woven with a subtle texture on its face for a modern, athletic look, while Stay-Dri moisture management technology keeps you cool and dry.

Low Pro

Low Pro is our lower profile structured crown shape. Featuring buckram-lined front panels, this profile offers a more tailored fit.

Mid Pro

Mid Pro is our most popular structured profile and is found across our product line, from performance baseball to the iconic 112. Over 50 years of cap-making experience has perfected this shape - not too high, not too low, just right.

No Button

Our No Button crown is designed to eliminate pressure points caused by ear protection used in shooting. By removing the traditional button at the top of the cap, this innovation offers a smoother fit under ear protection devices for enhanced comfort during prolonged use.

Packable

A lightweight foam construction in the bill allows caps to be folded and packed into a backpack and still come out wearable on the other side. These unstructured caps also allow for easy stowage without impacting shape.

Peach Brushing

A textile finishing process where the surface of the fabric is lightly abraded with brushes to create a soft, suede-like feel, reminiscent of the texture of a peach's skin. This technique enhances the tactile quality of the fabric and adds a subtle, luxurious appearance.

Precurved

Precurved bills are shipped factory-shaped with the perfect curve, meaning the cap is ready to wear with a natural, ergonomic fit that conforms to the shape of the wearer's face, offering better sun protection and a classic look.

R-Flex

R-Flex stretch in the sweatband and crown makes sizing simple, improving comfort and performance during long periods of wear.

Relaxed

Relaxed is our lowest profile, unstructured shape that fits closer to the head for a more casual look and feel.

Ripstop

Ripstop fabric is lightweight yet highly durable and characterized by its reinforced weave that prevents tears and rips, making it ideal for outdoor gear, workwear, and any application where fabric strength and durability are paramount.

Sandwich Insert

A contrasting strip of material is inserted along the edge of the cap's bill between the top and under panels, adding a subtle yet distinct color pop to the cap and a dynamic way to customize your team's look.

Sportmesh

This tightly knitted stretch mesh gives a clean, technical appearance with improved fit characteristics for advanced performance and comfort during all-day wear.

Standard Sweatband

Made from soft, durable cotton, our Standard sweatband provides all-day comfort while keeping sweat out of your eyes.

Stay-Dri Moisture Management

Breathable performance polyester wicks moisture away from the body to the outer area of the fabric to accelerate evaporation. Faster evaporation helps keep the fabric dry and light so the wearer stays ready for whatever comes next.

Stay-Dri Sweatband

Moisture-wicking technology where you need it most - the sweatband - to keep you cool, dry, and comfortable.

Underbill

The underside of a hat's bill or brim. This area can be designed with various colors, patterns, or textures, distinct from the rest of the cap, adding an additional element of style. The underbill's color and material can also reduce glare in sunny conditions.

UPF Protection

UPF stands for Ultraviolet Protection Factor. It's a rating system that measures how much UV radiation a fabric blocks from the sun. The higher the UPF rating, the more UV radiation the fabric will block.

Visor

Visors are designed to shield the sun from your eyes while keeping your head cool. Smaller, simple decorations tend to work best on this style of headwear.

Water Repellent

A combination of tightly woven fabrics and hydrophobic treatments repels water to help keep you dry and protected from the elements.
